

Right Angled Adapter Option for Low Cost Titanium Cameras

High Resolution

Small Size & Weight

Low Light Sensitivity

**6000m Rating
Option Available**

Titanium Housing

The Right Angled Adaptor can be fitted to any of the Low Cost Titanium housed monochrome or colour cameras. It is an option which can be added to the cameras after they have been purchased.

The adaptor adds 34.6mm to the length of the camera which brings it to a total length of 134.80mm, but the diameter of 31mm remains unchanged.

The addition of the right angled adaptor makes the camera range even more versatile and suitable for a wider range of applications.
