

Features & Specifications

Working pressure: 450m

1200 lumens output via 7 element LED array

Focussed spot beam of 19°

Helium relief valve with sediment screen

Pressure relief range: 0.3 - 0.6 bar

On/Off control via adjustable switch ring

Dimensions: 259 x 50.8 mm (65mm dia. at head)

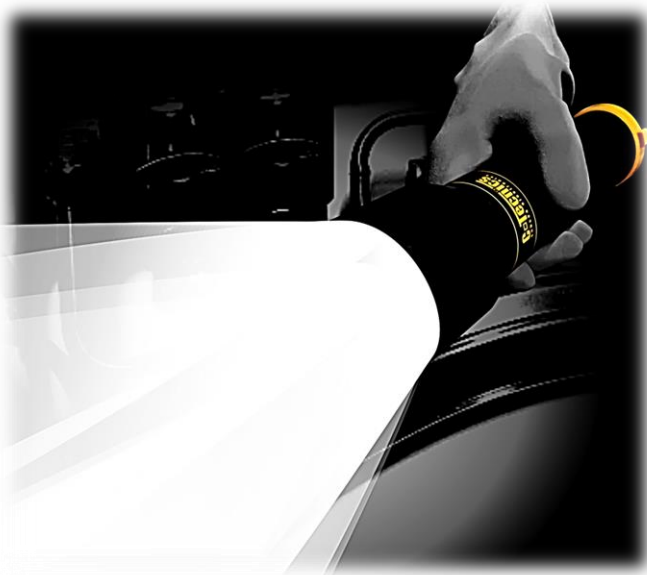

Weight (in air, with batteries): 1280 grams

Batteries: 2x D Cell Alkaline

Supplied with: Lanyard, carry case, 2x D cell alkaline batteries

Part No: CT4008

Applications: Commercial Diving

Saturation Diving Torch with Helium Relief

The C-Torch is specially designed for safe use in Helium environments such as closed bells where the risk of helium ingress can potentially cause serious issues when the pressure cannot be released during depressurisation of the bell. The C-Torch incorporates a Helium relief valve that allows the pressure inside the torch to be vented when a pressure difference exists.

The C-Torch is smaller, brighter, lighter and safer than any other torch designed for Helium environments. The C-Torch is designed to be used in both wet and dry environments and is pressure tested to allow a working pressure of 450m.
